## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 21-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8/2/04.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,4-9,29-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Verbeek in view of Warner (5,836,650). Verbeek discloses the use of a backrest (32) having a top portion (36) movably connected to a bottom portion (30) wherein the position of the top portion is vertically adjustable; a flexible latch (164) connected to one of the top and bottom portions; and notches (figure 10) located in the other of the top and bottom portions; wherein the latch is positioned to engage one of the notches to fix the position of top portion relative to the bottom portion; wherein the latch is configured to bend (194, see figure 12-13) when contacted by the member; wherein the member includes a wedge (134, figure 10) shaped surface positioned to contact the latch. Verbeek shows the use of all the claimed invention but fails to show the use of a release

mechanism includes a handle that is moved to disengage the latch from the notch; wherein the latch is biased toward the engagement. Warner teaches the use of a release mechanism (15) includes a handle that is moved to disengage the latch from the notch; wherein the latch is biased (55) toward the engagement. It would have been obvious to one of ordinary skill in the art at the time of invention to modify the child seat with a release mechanism as taught by Warner, in order to adjust the child seat.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1,4-9 and 29-35 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
